

# EnvironXchange

India's leading digital platform for the environmental industry, offering tools for promotion, networking and B2B communication.

Category Platform

Stack Laravel 11 · Microservices · MySQL · REST APIs

## OVERVIEW

---

Designed and implemented microservice-based APIs. Developed scalable modules for directory listings and advertisement posting, with attention to system performance over large-scale data.

**Features:** business listing management, a targeted advertisement engine, environmental news and event updates.

**Key integration:** microservice API structure.
